

Delfi is an everbearing variety that stands out because of its vigour and its high yields. Its long trusses and its well-exposed fruits allow an easy picking. The inflorescences are made up of a limited number of flowers, and this characteristic guarantees a medium-to-high size over the whole season. The fruits have a regular shape and a pleasant flavor and deep red colour.

Plant

Type	Everbearing
Habit	Very robust and stoloniferous Expansive crown
Productivity	High
Production period	From mid-June to the first frosts

Fruit

Shape	Varies from ovoid shaped (June) to elongated cone shaped (September)
Colour	Brilliant dark red
Size	Medium-large
Firmness	Medium
