

Dolomia Plus is a primocane variety that stands out because of its ease of harvest and its high yield. The high firmness and the resistant skin make this variety particularly suitable to mechanical harvesting. The fruits are characterized by a pleasant and round taste.

Plant

Type	Primocane
Habit	Robust Spreading habit High number of fruiting laterals
Productivity	Medium-high
Production period	Autumn: mid-season Spring: mid-season

Fruit

Shape	Elongated cone
Colour	Dark red
Size	Medium (average fruit weight: 5.1g)
Firmness	Very high
Detachment	Very easy
