

Lagorai Plus is a floricane variety with a good plant hardiness, leader of European markets. Its plants are defined by high yields that can be easily harvested thanks to the short laterals that grow regularly along the cane. Lagorai Plus fruits show a good firmness and a resistant skin, that lead to a long shelf-life. Thanks to the fruit's attractiveness, due to a combination of shape, regularity and brilliance, and to its delicious taste, Lagorai Plus is one of the most demanded cultivars on the market.

## Plant

Type	Poor apical flowering in the autumn but used to floricane.
Chilling requirements	Medium (600-700 hours)
Habit	Robust Short and uniform laterals along the stripling
Productivity	High
Production period	Spring: mid-season

## Fruit

Shape	Elongated cone
Colour	Bright red
Size	Medium (average fruit weight: 5.7g)
Firmness	High
Detachment	Very easy
